Gtee semantic model mapping session by WGs #1 and #2, 2019-10-25, 14-16 CET

Attending:
Hugo Verschoren
Mario Reichel
Saila Alapiha
Tiina Nissinen
Eduard Vugmeister
Kirsi Larkiala
Seija Haavisto-Virtanen
André Casterman

Items discussed:
- new member from Standard Chartered, Eduard Vugmeister, was presenting himself with some background info
- Walk-through of the current and renewed semantic model
    - URL standard text available in common repository, maybe even provided and collected by ST community at www.standardisedtrust.com
    - Code lists to be transformed to drop down lists to make us even easier
    - use of URDG rule indication will release gtee from a lot of free text (updated now into model)
    - Undertaking wording text to be tagged in the beginning, if not ready made reference texts are available for this purpose (updated now into model)
    - merge of sheet 11. and 2. Undertaking type (CLAM and RENT)
    - bank accounts available for different needs also as a generic bank account model
        - instances from zero to many
        - same logic applies to Undertaking Party
    - Instruction to bank
        - Instruction field needed
        - Harri to make a new suggestion how to make that available for more generic use
- next steps
    - clean-up of the worksheet as discussed
    - new meeting at the end of November
        - all comments are welcomed
    - all the members of WG 1 and WG 2 are invited to test the existing gtee samples from OneDrive folder to be mapped to the model
    - copy the new model to
        - issuance and
        - amendments of the gtee
- ICC's Andrea Hauptmann to nominate a member to our work
    - Hugo to remind Andrea
