

## Gtee semantic model mapping session by WGs #1 and #2, 2020-02-10, 13-16 CET

### Attending:

Eduard Vugmeister  
Hugo Verschoren  
Harri Rantanen  
Kirsi Larkiala  
Saila Alapiha  
Seija Haavisto-Virtanen  
Olli Jääsaari  
Marika Toikka  
Tiina Nissinen  
Laura Ahvenainen

### Items discussed:

- any work done according to the previous meeting (2019-12-16) task list
  - o Hugo has created some documents for the standard texts templates as well as a use case #3 as a Belgian Advance Payment guarantee
  - o Laura and Tapio have done a basic data setup of URDG Demand Guarantee use case #2
  - o Harri continued the gtee life-cycle stages description
    - Olli will support Harri on this for upcoming stages
- Walk-through of the current semantic model status
  - o First of all, the additional use cases seem to fit quite well into the Application template
    - We discussed though of separation of a “normal” guarantee issuer and counter-guarantee issuer type codes. Yet the current description of the Issuer code covers both the actual and counter-guarantee issuer
    - this will be decided later
  - o Harri presented the changes to the basic guarantee semantic model template
    - some new code set needed and updated to the <https://standardisedtrust.com/resources/guarantee-code-lists/page>
    - we agreed to continue Issuance stage into the same template and show there only new elements needed for each life-cycle stage
    - Harri has also (after meeting) added and merged the new use cases into the common template and it is now available for the whole community review and comments at <https://1drv.ms/x/s!AraI44MGEo7Bgh6tjthyNErsSAVM?e=LSiFHU>
- next steps
  - o Let us discuss the status and seek for guidance at the upcoming Standardised Trust Plenary meeting on the 26<sup>th</sup> of Feb
  - o anyway we suggest the work to be continued in three streams
    - map available gtee texts
      - coordinated by Hugo and supported by Harri
    - broaden the use cases
      - coordinated by Laura and supported by Tapio
    - next steps on gtee life-cycle
      - coordinated by Harri and supported by Olli
  - o all above listed streams will need resources: so please indicate if voluntary to respective coordinator or coordinators
