The agenda

 - ii. Maybe separate session for ICC UK activities in December. ICC Finland representation should be invited. Smart Government ongoing in Nordics but apparently no action regarding MLETR. Also, no notion if something similar to MLETR ongoing in other European countries?
 - b. CGI-MP collaboration
 - i. Harri presented poll results. There were only five replies so the amount was relatively low. Generally it was seen as positive alternative. Some cons were recognized also, mainly regarding different approaches to work. Mario shared his views from CGI-MP participant's point of view. Possible conflict: ST talks about json-model and business view and CGI-MP is slowly moving towards standardisation of APIs with a very big amount of plenary stakeholders. Swift is again also participating in the discussions. Mario will try to arrange a discussion with CGI-MP management team. Likely time late January – early February. ST will share the preliminary material in advance.
 - ii. Next steps
